

Adobe® Acrobat® 3.0

The fastest way to publish documents on-line

Communicate without limits.

Internal corporate intranets and the World Wide Web are revolutionizing the way the business world accesses information, making it more crucial than ever that everyone in your company be able to send and receive business documents on-line and across computing platforms. You need a communications solution that enhances your productivity by letting you take advantage of the tools you already know. A solution that preserves your unique corporate identity. A solution that is as efficient and ubiquitous as the phone or e-mail.

Get everything you need in a single package.

Adobe® Acrobat® software enables everyone in your company to create and share business documents across platforms, with original formatting intact. The software includes a complete toolset for converting electronic files into the Adobe Portable Document Format (PDF) and publishing them on-line. Whether you use a word processor, CAD software, or Adobe FrameMaker®, you can quickly deliver business documents to a colleague or to the entire company. Anyone with a Web browser and Adobe Acrobat software can access PDF files. And because it is independent of platforms, applications, and distribution media, Acrobat is the ideal basis for your long-term information distribution, archiving, and retrieval strategy.

Quickly make PDF files from any application.

Creating PDF files from faxes, letters, memos, spreadsheets, technical publications, manuals, and colorful brochures is as easy as printing. No reauthoring or conversion is necessary. Best of all, PDF files look exactly like the original documents, complete with fonts, graphics, images, and page layout. Acrobat lets you communicate your message exactly as you've created it.

Publish PDF files anywhere.

Send PDF files down the hall or around the world on CD-ROM or attached to an e-mail, as well as on your intranet and external Web sites. Send out a memo for review. Distribute an encyclopedia of marketing collateral for your field sales team. Circulate contracts, corporate forms, presentations, or financial reports. Publish documents once and distribute them universally. With Acrobat, cross-document hypertext links and bookmarks continue to function, without relinking or reauthoring. Distribute free Acrobat Reader with Acrobat Search software on your corporate network or CD-ROM, and everyone in your workgroup can search entire collections of PDF files in minutes. You can even print PDF files on demand to any printer.

View PDF files within the leading Web browsers.

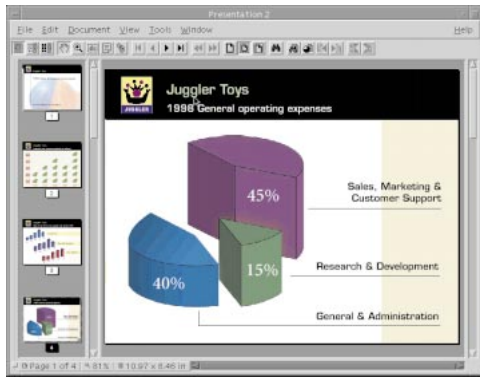

Acrobat software is ideal for Web publishing, because it integrates the viewing of PDF files directly into Web browsers that support the Netscape Navigator™ plug-in architecture. Within your Web site's HTML structure, you can include PDF files that can be scaled, searched, zoomed in on, and printed at full resolution. In addition, Acrobat 3.0 optimizes PDF files for on-line delivery with new compression features that make PDF files smaller than ever, allowing readers to view documents a page at a time on the Web. You can even batch-optimize entire folders of PDF files for posting.

Take advantage of the on-line printing standard.

Acrobat is optimized for the most demanding printing requirements. You can print any PDF file, complete with TrueType™ and Type 1 compressed fonts, at the maximum resolution of any printers.

UNIX®

Create instant, full-screen presentations from your PDF files, complete with multiple transitions and automatic navigation.

contents

- Acrobat Exchange™ software
- Acrobat Distiller® software
- Acrobat Reader with Acrobat Search (Macintosh®, Windows®, and UNIX versions)
